Very nice, wooded tract with multiple home sites overlooking twelve-mile creek. The land has gentle hills going down to the creek and offers plenty of privacy surrounded by mature woods. You could have build sites on both sides of the creek if you like. Buyer will need to install a well and septic. This tract could also be subdivided up to 5 times, so plenty of options for a developer. This tract is in a nice area with easy access to Pickens. A well and septic will need to be installed. Light restrictions, stick built only, 1200 sq ft minimum.
